

# MLK CENTER

April 2017

[View this email in your browser](#)

Since January 2016, the Youth Program at the MLK Center has grown from three students to more than 40 today. 80% of the students attend IPS School #43 located just one block west of the Center. We learned that approximately 75% of our students are struggling with reading. We are building a reading culture at the MLK Center, in our neighborhood and at home with our parents. Check out this video....

Thank you to Professor Watermelon and the Indy Learning Team for this great partnership.
